PROFILE

Results-driven Full-Stack Web Developer and Technical Writer with expertise in building scalable web applications, modern JavaScript/TypeScript architectures, and high-performance user interfaces. Experienced in delivering production-ready solutions and comprehensive technical documentation for international clients.

EXPERIENCE

Freelance Development

2024 - Present

Full-Stack Freelance Engineer

- Architecting and delivering production-ready web applications, responsive client interfaces, and robust Python backend systems.
- Optimizing web assets for ultra-high Lighthouse scores: Sub-second load speeds, strict SEO semantics, and top UX fidelity
- Contracting for both international clients and solo founders on team and standalone missions

Private Contractors & Freelance Platforms

2022 - 2024

Technical Writer & Frontend Freelance Developer

- Crafting high-impact architectural documentation, API guides, and technical whitepapers for scaling tech startups.
- Developing responsive, high-performance client-side interfaces and component libraries for international freelance clients
- Bridging complex system engineering concepts with clear, developer-friendly documentation and clean modular codebases

BSc Computer Science Candidate

2018 - 2023

The East African University

- Completed rigorous computer science curriculum covering object-oriented programming, data structures, algorithms, operating systems, and computer networks
